I'm writing this recognition for a gentleman who is making a positive impact regarding student health issues in our country. I first met **Dr. Stephen R. Sroka** as a result of his invitation to address junior and senior high students in Bethel, Alaska, during the 98/99 school year. Dr. Sroka spoke to students at two assembly type settings with students directly and indirectly interacting with him during his presentations. He knows how to "speak their language" and enables students to become active listeners. He has a gifted ability to address timely but sensitive topics such as sex, drugs, and behavior issues in a non threatening manner. Demonstrating ones knowledge level and making a student audience feel comfortable and responsive is no easy task. He does this exceptionally well.

Having been a principal for 16 years, I have had the opportunity to acquire the service and view a variety of presenters in school settings. Dr. Stephen Sroka stands out among them as the top in his field. I endorse and highly recommend "Dr. Steve" as a presenter and a knowledgeable educator on health/social issues

Sincerely,

A handwritten signature in cursive script that reads "Ron Magee".

Ron Magee, Principal  
Bethel Regional High School
