Dear Dr. Sroka,

I wanted to say THANKS to you for spending time with our students here at Oglethorpe Academy. As you know, we are a very diverse group, and our students loved your message! Many of the students asked if we could have car washes on Saturdays to raise money for you to come back! I believe they deal with these very threatening issues alone most of the time, and they desperately need adults with the courage to open up and be honest with them. That is what you did.

Seeing you interact with my students reminds me of watching three and four year olds mesmerized by Mr. Rogers. Just as he had the perfect way of communicating with them, using their language and tone, you have developed a talent for captivating the interest of teenagers! I feel so fortunate that you were able to come here and will make every effort to have you come back each year.

Yours truly,

Selma Bernard
